

# HILMAN SpaceSaver® ROLLER SHEAVE

Use HILMAN SpaceSaver®  
 ROLLER SHEAVES  
 for:

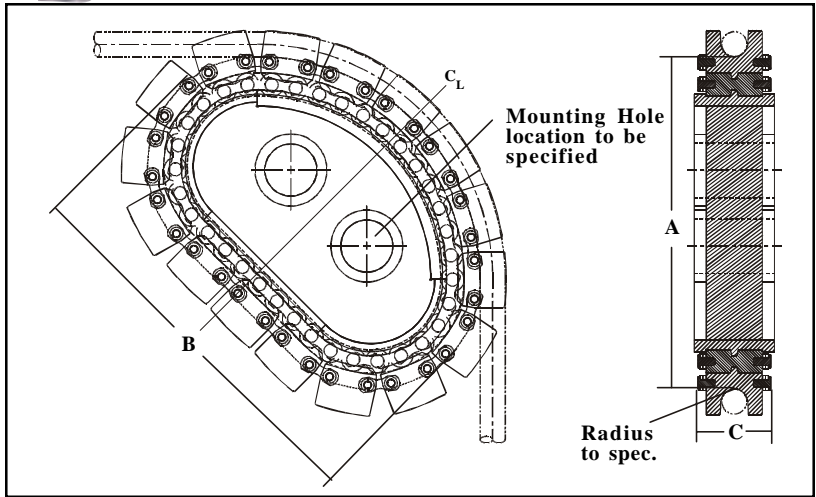

- Lifting Flexible Risers
- Laying Cable
- Servicing and Replacing Pipe
- F P S O Operations

On board ship or a rig , where space is at a premium, Hilman’s SpaceSaver®Roller Sheaves provide high capacity, low friction movement in an efficient space saving package. Based upon the same principle as the chain roller, Hilman’s SpaceSaver®Roller Sheave will replace the traditional sheave in much less space.

In a typical application, the sheaves are used to install mooring anchor legs and flexible production risers from the sea floor to the floating production vessel, and to remove and replace risers as required for general maintenance. Because the sheaves are usually mounted in an exposed location on deck where they are exposed to salt spray and the elements, they are often constructed using galvanized high strength alloy steel, with stainless steel in all crucial areas.

These Roller Sheaves, and other Hilman products have met Lloyds, ABS, and DNV approvals. Contact Hilman Engineering to discuss your specifications.

## A TYPICAL HILMAN SpaceSaver® ROLLER SHEAVE

MODEL	CAPACITY	WIRE ROPE DIAMETER	DIMENSIONS			ESTIMATED UNIT WT.
			A	B	C	
#360-S	250 metric tonnes	2-1/2" 64mm	23-1/2" 596mm	37-5/8" 955mm	8" 203mm	1500 lbs. 680 kgs.

Hilman SpaceSaver Sheaves are Custom designed. Contact Hilman Engineering with your specification. Patent Pending.
